

## About the Journal

### About IJAHHP

IJAHHP is a scholarly journal that publishes papers about research and applications of the Analytic Hierarchy Process (AHP) and Analytic Network Process (ANP), theories of measurement that can handle tangibles and intangibles; these methods are often applied in multicriteria decision making, prioritization, ranking and resource allocation, especially when groups of people are involved. The journal encourages research papers in both theory and applications. Empirical investigations, comparisons and exemplary real-world applications in diverse areas are particularly welcome.

Any visitor to this site can browse the abstracts but to read the contents and download the PDF files, you need to be a registered user and log in. Registration is free for authors, reviewers and readers in general, and your contact information will only be used to inform you when a new issue is published. Most importantly, **there is no article processing charge for the authors, publications are free of charge** since IJAHHP production is subsidized by the Creative Decisions Foundation, established in 1996 by Thomas L. Saaty and his wife Rozann Whitaker Saaty with a purpose of educating people in the world to help them make more

rational decisions.
