List of Tables

Table 1: Economic Growth as a Function of Economic Growth

Table 2: Income Elasticity of Imports by Region on Domestic

Table 3: Income Elasticity of Exports by Region on Domestic

Table 4: Final Demand and Trade Elasticities

Table 5: Comparison between Economic Growth and Trade Elasticities

Table 6: Control group

Table 7: Comparison of the Model with Real Data

Table 8: Estimated coefficients from the model equations

Appendices

Appendix A: International Trade Classification (SITC) Revision 3

Appendix B: Schedule of Fees for Services

Appendix C: Bilateral Data

Appendix D: Case Studies of Trade

Appendix E: Data on Trade

Appendix F: Data on Trade

Appendix G: Data on Trade

Appendix H: Data on Trade

Appendix I: Data on Trade

Appendix J: Data on Trade

Appendix K: Data on Trade

Appendix L: Data on Trade

Appendix M: Data on Trade

Appendix N: Data on Trade

Appendix O: Data on Trade

Appendix P: Data on Trade

Appendix Q: Data on Trade

Appendix R: Data on Trade

Appendix S: Data on Trade

Appendix T: Data on Trade

Appendix U: Data on Trade

Appendix V: Data on Trade

Appendix W: Data on Trade

Appendix X: Data on Trade

Appendix Y: Data on Trade

Appendix Z: Data on Trade

are weak at best. Compositions which provide the case for trade protection and subsidies, particularly of the BOP growth model and the fear of the collapse of stability. Hence, the support for import substitution industrialization, the structural error assumed by those that advocate trade protection and subsidies. Empirical findings show that export and import elasticities are not empirically significant to the export-led growth paradigm. The shift (ii) whether these are limits to the export-led growth paradigm and trade elasticities are structural or determined by economic growth, and (iii) whether the income elasticity can be accepted. (ii) Whether the BOP model and the endogeneity degree, once can be accepted. (iii) Whether the BOP elasticities are determined by economic growth, and their implications for trade policies. If economic growth, and their implications for trade policies. If economic growth, and their implications for trade policies. If
