Abstract

∨ View reference

Malaysia, in the Malaysia Urban Forum (MUF) 2019 aims to realize the vision of the World Urban Forum (WUF) theme of 'Cities 2030, Cities for All: Implementing the New Urban Agenda' that is in line with Sustainable Development Goals (SDG). The introduction of the Malaysian Standard started in 1990 but not acknowledged the establishment of the Persons with Disabilities Act in 2008 and gazetted in the Uniform Building ByLaws (UBBL) amendments despite the slow pace of accessibility awareness in urban development and implementation. The methodology compares the establishment of notable Inclusive and Accessible Cities with their planning strategies implementing Universal Design. Findings and results will determine inclusive city's strategies from each case study documented and device a framework of projection for cities' inclusivity. Conclusively, this study would determine the anticipation of Malaysian urban cities to be Inclusive and Accessible in 2030 by strategising action plans and a framework for ten (10) year planning.
