# PROLOGUE...

There is a recent tension across the Atlantic due to the issues of data security, data privacy and data governance

The EU stops Europeans and European companies to transfer personal data to the US due to a concern that the data in the US may not be safe, subject to surveillance regulation.

The US stops the operation of TikTok and Wechat – both Chinese entities – in the US due to the concern that customers data would be misused by Chinese propagandists.

This situation shows how important it is to establish a secure and trustworthy data and digital systems.

15 JULY 2020

The EU Court of Justice decided that the EU-USA Privacy Shield Agreement is null and void

COUR DE JUSTICE  
DES COMMUNAUTÉS  
EUROPÉENNES

6 AUG 2020

The US Government banned TikTok and Wechat from operating in the US due to data security and data privacy concern.

# WSIS Geneva Declaration of Principles – Building the Information Society (12/12/2003)

---

## Building confidence and security in the use of ICTs

Strengthening the **trust framework**, including information security and network security, authentication, privacy and consumer protection, is a **PREREQUISITE** for the development of the Information Society and for building confidence among users of ICTs.

It is important to enhance **security** and to ensure the **protection of data and privacy, while enhancing access and trade.**

# ASEAN Framework on Personal Data Protection (2016)

---

COMMITTED to an **inclusive and integrated ASEAN** through cooperation in the field of Information and Communications Technology (ICT) and to propel ASEAN towards a **digitally-enabled economy that is secure, sustainable and transformative**;

Transfers to Another Country or Territory:

organisation should either **obtain the consent** of the individual for the overseas transfer or take **REASONABLE STEPS** to ensure that the receiving organisation will protect the personal data consistently with these Principles.
