Abstract

View references (12)

We describe here the draft genome sequence and basic characteristics of *Escherichia coli* isolate INF13/18/A, which was isolated from Universiti Sains Malaysia (USM) Hospital. This isolate was identified as an extended-spectrum β -lactamase-producing *Escherichia coli* strain harboring the antimicrobial resistance genes TEM, CTX-M-1, and CTX-M-9. © 2020 Wan Makhtar et al.
