

ENVIRONMENTAL WEBINAR: BE A FORCE OF NATURE – ENVIRONMENTAL CARE

Abstract for the webinar

Caring for the environment is the duty of everyone. Whatever that we have today is actually borrowed from the future generations. They need to be returned in the best shape and manner. However, we are witnessing environmental destruction as the result of actions by mankind. Farming is one of the activities that can be harmful to the environment. Hence, environmental care strategies must be planned and actions must be taken. Integrated and sustainable farming must be adopted to ensure we carry our roles as the khalifah as entrusted by Allah swt.
