Abstract
Objectives: This is a protocol for a Cochrane Review (intervention). The objectives are as follows: To systematically evaluate the safety and efficacy of different antiseptic solutions in preventing CRBSI and other related outcomes in neonates with CVC. Copyright © 2021 The Cochrane Collaboration. Published by John Wiley & Sons, Ltd.

Index Keywords
chlorhexidine gluconate; all cause mortality, antisepsis, Article, catheter infection, chemical burn, contact dermatitis, dermatological procedure, drug efficacy, drug safety, hospital discharge, hospitalization, human, neonatal intensive care unit, newborn care, patient participation, practice guideline, priority journal, randomized controlled trial (topic), systematic review, treatment outcome

Chemicals/CAS
chlorhexidine gluconate, 18472-51-0
