

# **The Islamic Perspective on Organ Transplantation: Case of Eye Transplantation**

**Assoc. Prof. Dr. Ibrahim Shogar**

Kulliyah of Science, IIUM-Kuantan

Presented at

**18<sup>th</sup> ISLAMIC CLINICO-PATHOLOGICAL CONFERENCE (iCPC 18)**

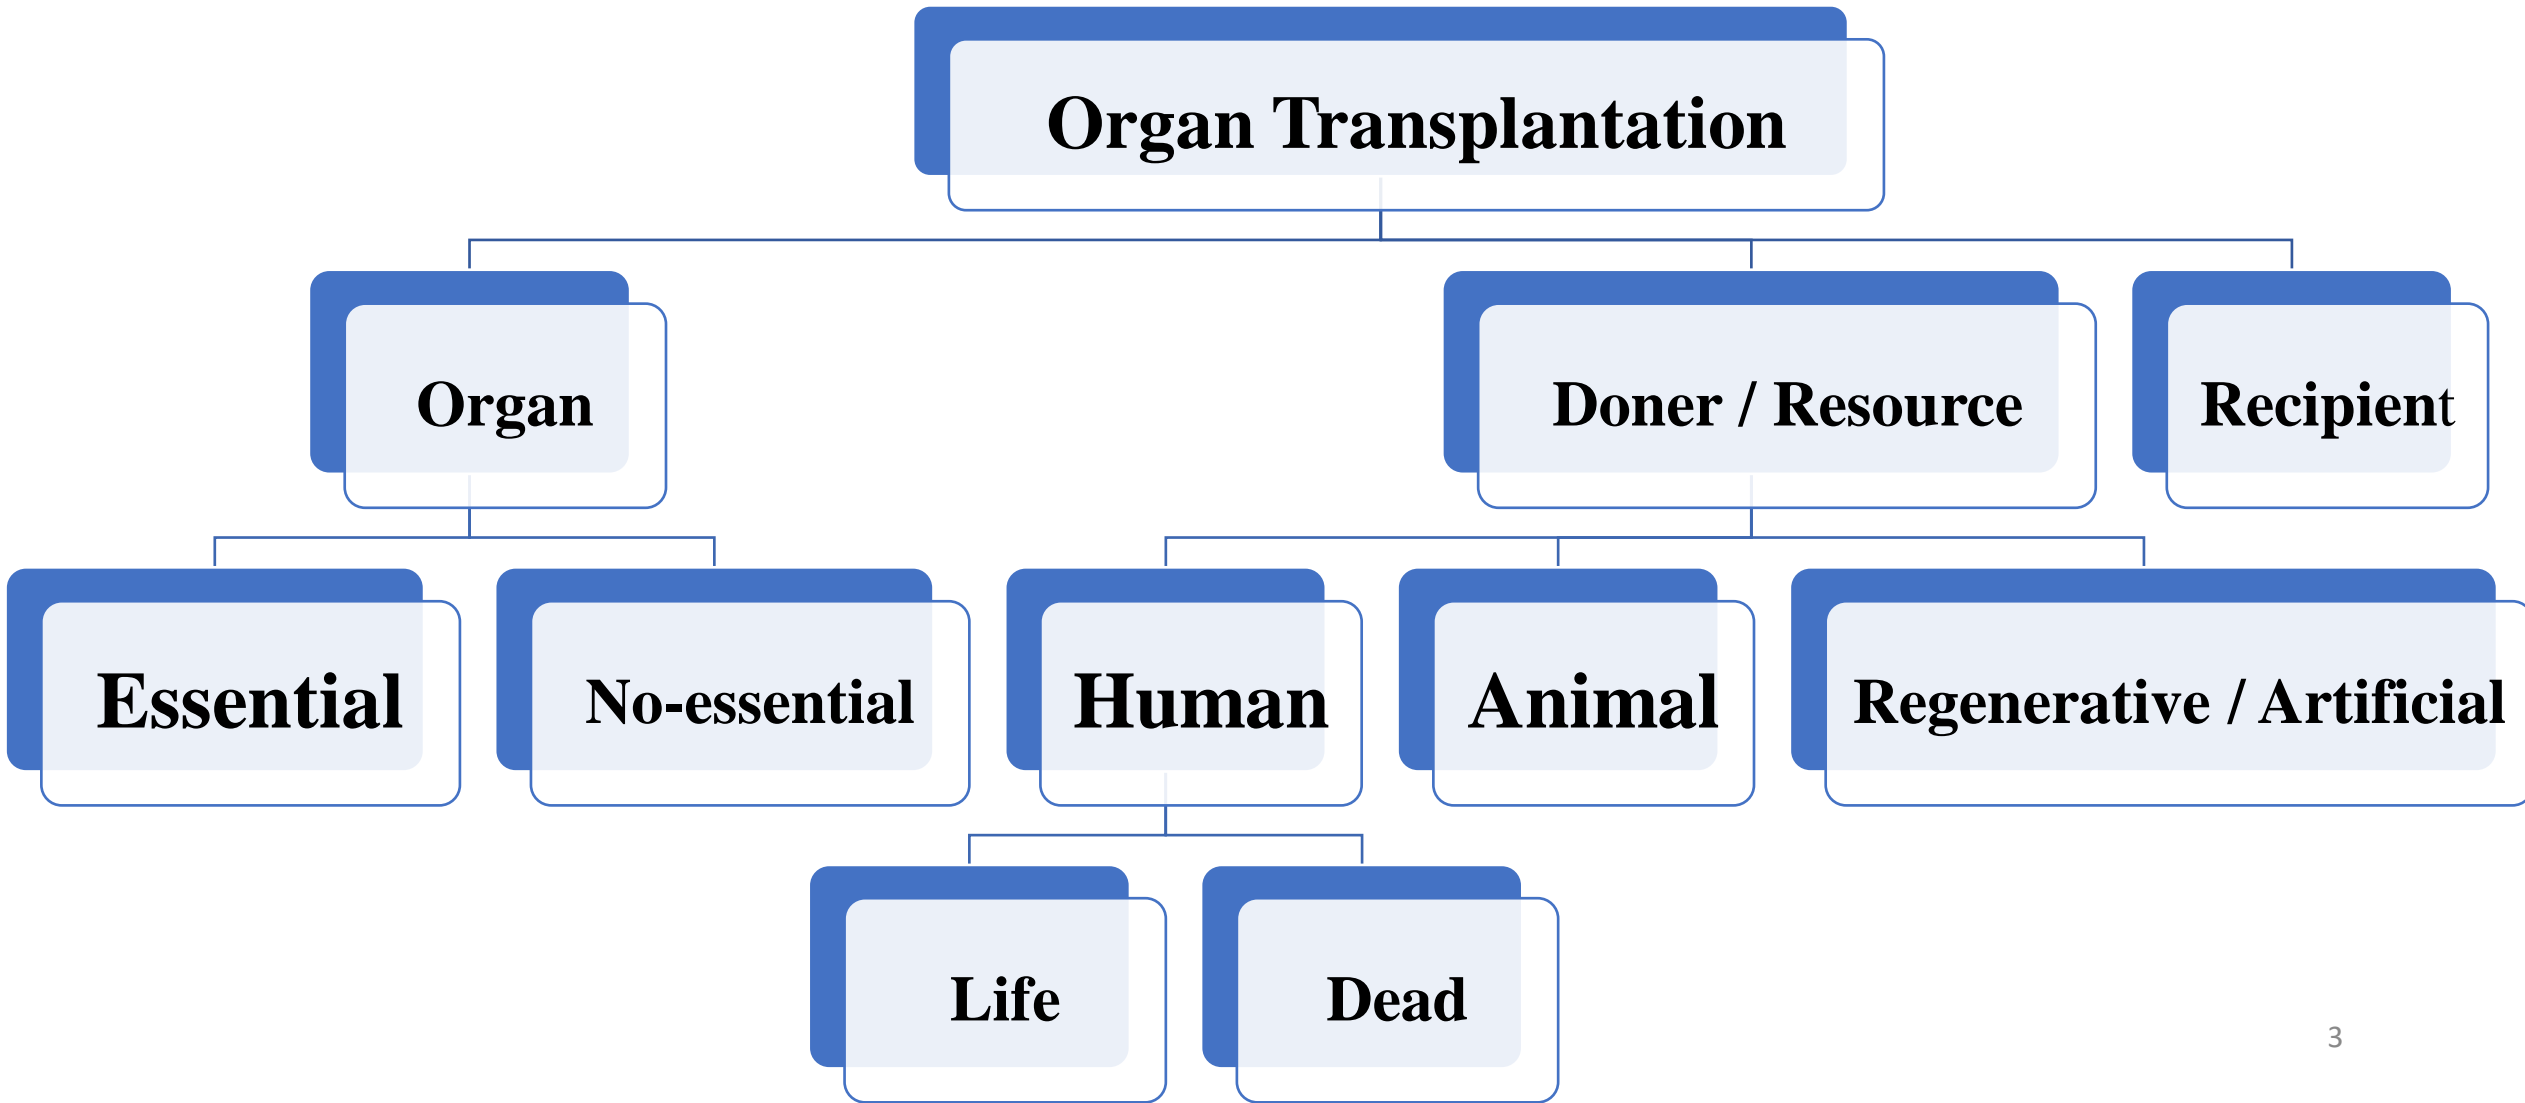

**Organized by Kulliyah of Medicine and CENTRIS**

**28/05/2021**

# General Overview

- Advancement in biomedical engineering has brought a great hope for new life or better to many helpless patients across the globe.
- However, organ transplantation also has posted many ethico-legal questions
- From Islamic perspective organ transplantation can be viewed from three major dimensions
  - i. The technical dimension (Restorative & Regenerative)**
  - ii. The philosophical dimension**
  - iii. The ethico-legal dimension**
- Each of these dimensions posts different questions

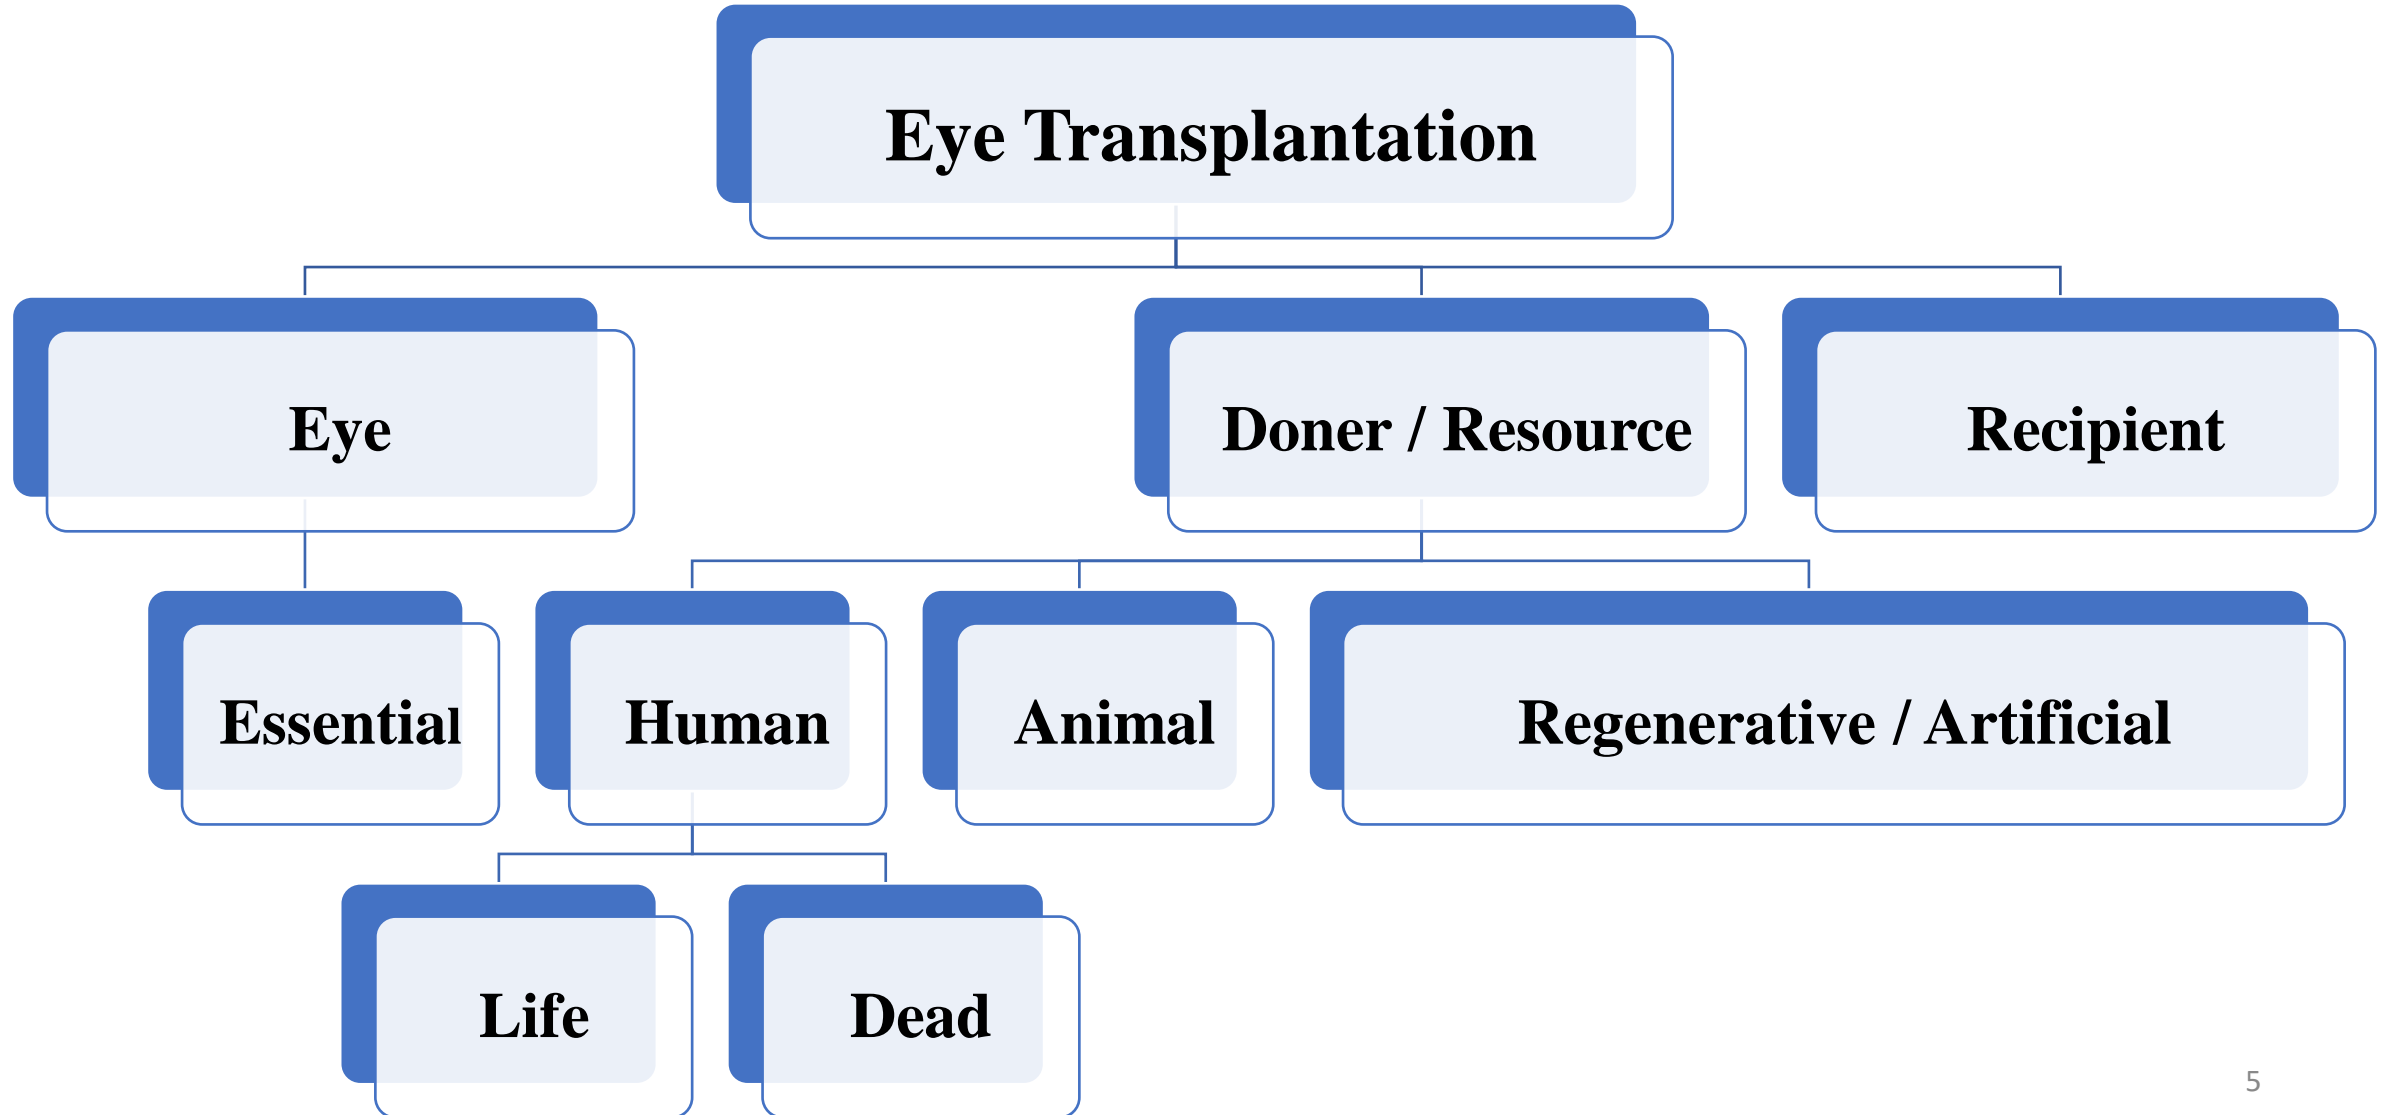

# The Islamic View

# What is the Islamic Perspective on Eye Transplantation?

- Technical matters (**Restorative & Regenerative**)
- Theoretical matters
- Ethico-Legal matters

# Islamic View on Eye Transplantation

# **Ethical matters in Eye Transplantation**

- i. Ethical questions related to technical part (doctor & patient ethics)
- ii. Ethical questions related to donors and lack of resources
- iii. Ethical questions related to financial implications

# The End

السلام عليكم ورحمة الله وبركاته
