Invitation

Paris, France

Dear Attendees,

Conference Series LLC welcomes you to attend the **7th International Veterinary Congress** during **September 04-05, 2017, Paris, France**. We cordially invite all the participants who are interested in sharing their knowledge and research in the field of Veterinary.

Veterinary 2017 anticipates more than 300 participants around the globe with thought provoking Keynote lectures, Oral presentations, Symposiums, Workshops and Poster presentations. The attending delegates include Editorial Board Members of related Journals.

This is an excellent opportunity for the delegates from universities and institutes to interact with the world class scientists and eminent personalities.

The intending participants can confirm their participation by registering for the conference along with your colleagues. Avail the delegate Early Bird Offer.

The main theme of the conference is **“Impeccable Growth of the Veterinary Sector”**.

We look forward to personally welcoming you to Paris this October.

Sincerely,

Veterinary 2017

Organizing Committee

Market Analysis Report for Veterinary 2017

Paris, France

This veterinary conference focuses on the exponential growth taking place in the veterinary sector. Veterinary medicine has responsibilities in biomedical research; ecosystem management; public health; food and agricultural systems; and care of companion animals, wildlife, exotic animals, and food animals. The veterinary profession contributes to improvement of human and public health by improving agriculture and food systems, advancing biomedical and comparative medical research, preventing and addressing zoonotic diseases, enhancing environmental and ecosystem health, and helping manage 21st century public health challenges.

We take this opportunity to welcome you all in Paris, France. Mark Veterinary 2017 in the veterinary conferences 2017 calendar and join us to have an exciting experience and worthy scientific moments.

Significance and Scope

The top destination countries of VET students doing a registered work placement are all European. Spain, France, Belgium, Germany, the United Kingdom and Austria make up the top 6. This is explicable in terms of effort, cost and opportunity, considering the visa-free movement of people within the EU and the excellent opportunities offered in Europe within the Reaserch programme. Of the almost 7,000 international work placements, 1,350 were done in countries outside the EU. Curaçao, Turkey, the United States, South Africa and Canada are the 5 most popular non-EU destinations. There are some strong links between destination countries, sectors and qualifications. Spain, France and Italy, for example, are very popular with students in hospitality programmes. Belgium, Austria and Germany are favourite destinations of students in care, well-being and/or sports. The UK scores relatively high with students in business services and security, and in trade. The increasing importance of VET in higher education and the extensive and important role played by continuing vocational education and training adds to this complexity and makes the task of judging the character and boundaries of VET in Europe increasingly more difficult. The project will, over a 3-year period, analyse how vocationally oriented education and training has developed and changed in the last two decades (1995-2015) and on this basis point to the main challenges and opportunities facing the sector today. This will be addressed from two angles: First, VET is defined by its position in the overall education and training system. The expansion of general and academic education has in some countries created an imbalance potentially undermining the ability of the VET system to serve the labour market and society. Second, VET is directly influenced by external factors, notably demographic developments and labour market trends driven by technological and organisational change. Combining these two angles of analysis, the research will clarify how VET is defined and

Cont...

understood by stakeholders at national level, how this understanding has evolved over time and, notably, how it has been translated into political strategies, institutional solutions and didactic approaches.

France Market Report:

France is the European leader in research and manufacture of veterinary medicines and reagents, with over 6,600 employees, and the largest therapeutic arsenal in Europe (2,700 marketing authorizations), 50 production sites and many research centers. The global attractiveness of France in matters of animal health lies in the density of this industrial, veterinary, and professional fabric, in its recognized scientific and technical expertise, and in the capacity of its manufacturers to invest in managing networked R&D projects and international projects.

To contribute to the competitiveness of its member companies, the SIMV federates laboratories around joint projects, proposes collective strategies in response to the expectations of society and represents the views of its members in its decision-making environment.

With the ambition to contribute to highlight the innovations of tomorrow, the SIMV is a member of networks such as the French Network for Animal Health (RFSa), mirror group of the European Platform (ETPGA), Hippolia (French foundation dedicated to equine research), ICSA (Animal Health Carnot Institute) as well as ARIIS (French Alliance for Research and Innovation of Health Industries).

With turnover of 829 million euros in France in 2013 and 1.5 billion euros in exports, including 700 million for the European Union alone, France is the European leader for research and production of veterinary medicines and reagents. This position is reinforced by the fact that 4 French companies (Merial, Virbac, Ceva, Vetoquinol) are in the world's top ten manufacturers of veterinary medicines and reagents.

At global level, our top three members, Zoetis, MSD Santé Animale (Merck & Co) and Merial (Sanofi) total over 50% of the sales. Half of the 38 members of the SIMV are small and medium-sized enterprises (with turnover of less than 1% of the market). The veterinary market includes the dynamic companion animals segment, driven by increasing investment from French people in the well-being of their pets (market share of 39%), and the food-producing animal segment which accounts for over one half of the market (56%). Finally, particular interest is given to horse-riding (the equine market share being 5%).

The economic model of the veterinary medicine industry has to take account of the large number of species of animals, requiring marketing authorization application forms that are specific to the various species, in particular when the animals are raised for human consumption.

Cont...

The diversity of the species and of their specific pathologies tends to split this market up (17% of the medicines sold reach a turnover of less than 40,000 euros). The 10 to 12% share of turnover that is devoted by the veterinary medicines industry to R&D procures growth through innovation of up to 6% per year for it. Historical reasons (Pasteurian tradition, first veterinary schools, strong ties with the fabric of the human health industry which is also very powerful in France, etc.) and economic reasons related to the numbers of animals in France have made the French market the second-largest animal health market in the world: 41 million large food-producing animals (cattle, pigs, sheep, and goats), in addition to 301 million heads of poultry (chicken, turkeys, and guinea fowl), 9 million rabbits, and 800,000 horses, and not forgetting 7.4 million dogs and 11.4 million cats.

Finally, breaking down the market by main therapeutic class reveals a predominance of prevention of infectious diseases by using vaccines and metaphylactic measures (vaccines 21%, antiparasitics 18%, insecticides 11%) rather than by using curative treatments (antibiotics 17%, topical treatment products 9%).

Global Market Research:

The global veterinary vaccines market is poised to reach USD 7.68 Billion by 2021 from USD 5.81 Billion in 2016, at a CAGR of 5.8% from 2016 to 2021.

Factors such as the increase in livestock population and repeated breakouts of livestock diseases; increasing incidence of zoonotic diseases; initiatives by various government agencies, animal associations, and leading players; and the introduction of new vaccine types are driving the veterinary vaccine market. However, the rising costs of storage & maintenance of vaccines and the increasing prices of meat (promoting the adoption of vegetarian diets) are hindering the growth of the veterinary vaccines market.

About Us

Paris, France

Our International Open Access Journals

- **700+** Leading-edge Peer Reviewed Open Access Journals
- **21 Day** Rapid Review Process
- **50000+** Editorial Board Team, **35000+** Reviewers team
- **30 Million Readers** and High Visibility
- **1000+ Scientific Associations** Collaborations
- **100000+**  Likes
- **Publication** immediately after acceptance
- **Quality and Quick** editorial, review processing

Salient Features

- **Easy to Submit** and Review Systems
- **High Quality** and Fast Publishing Guaranteed
- **Unbiased, quality-oriented**, and transparent reviews
- **Truly impartial recognition** of the best papers
- **Feedback** on the impact of every article
- **Enhanced feature:** Audio version of published paper
- **Digital articles** to share and explore
- **Sharing option:** Social networking enabled
- Authors, reviewers and editors are provided with **scientific credits**
- User friendly/feasible website articles **translations** across more than **50 world languages**

Our International Scientific Conferences

- More than **3000 Conferences** happening across the globe
- Conferences organized in **Medical, Pharma, Engineering, Science, Technology and Business.**
- **CME/CPD Accredited** Conferences fostering professional and Personal development
- **Continuum of education** through organized scientific program
- **Renowned speakers** and scientists representing from **40 countries**
- **Highly Interactive sessions** and Panel Discussions
- **B2B Meetings** offers perfect platform for Global Networking

Salient Features

- Robust on-line publicity for all the speakers and organizing committee members
- Career Guidance Workshops for students and early career researchers
- Accepted Abstracts will be published in various indexed journals
- Accepted abstracts will be labeled with a Digital Object Identification Number (DOI) provided by Cross Ref
- Creation of speakers and abstracts pages in Google
- Opportunity to publish full Manuscripts in our Open Access Journals

Special Issues : All accepted abstracts will be published irrespective Conference Series LLC Journals

Each abstract will be provided with digital Object Identifier by

About Conference

- **Veterinary-2017** Conference website is attracting **25000+** **Veterinary Technicians, Veterinary Scientists, Industry professionals, Veterinary Doctors, Researchers, Academicians, Students, Ornithologists and Veterinary Residents** visitors ranging from Researchers, Academicians and Business professionals, who are working in this field. This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

How Conference Series Conferences differs from others?

- **3000+ Conferences** across the globe in **30+ countries** all through the year
- Over **25 Million+ Visitors** and **20000+ Unique Visitors** per conference
- **Participation by Stalwarts** from various international societies
- **Internationally renowned speakers** and scientists representation
- **Career guidance** for early career researchers and students
- **Interesting scientific deliberations** and discussions
- **Perfect platform** for Global Networking

Veterinary-2017 salient features

- **Meet Academia and Industry** visionaries to get inspired
- **Expand your knowledge** and find solutions to problems
- **Knowledge, Benchmarking and Networking** offered at one place
- **Forge connections** and for global networking
- **Highly Organized** and Structured Scientific programs
- **Poster presentations** and world class exhibitions
- **Meet with new vendors** and suppliers

About Conference

Paris, France

Purpose

- **7th International Veterinary Congress** and Public Health is an arena for interdisciplinary exchange among professionals in the fields of Epidemiology, Medicine and Health.

Goals

- The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration. The goals of the conference is to provide a transformative professional development experience through
- Bringing together the world's scientific experts to catalyze and advance scientific knowledge about Veterinary Research and Veterinary medicine and Public Health present the most recent research findings, and promote and enhance scientific collaborations around the world
- Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address regional, national and local responses to Population around the world and overcome barriers that limit access to healthcare and services.

Objectives

After participating in this meeting, attendees should be able to

- Discuss emerging issues in Veterinary Research and Veterinary medicine
- Discuss and apply recent research findings related to Epidemiology and Public Health
- Reflect on the place of critical distance in Veterinary Research and Veterinary medicine

About Conference

Paris, France

Who should attend

7th International Veterinary Congress and Public Health is exclusively designed for Veterinary Technicians, Veterinary Scientists, Industry professionals, Veterinary Doctors, Medical Directors, Veterinary Nurses and Technicians Researchers, Academicians, Students, Ornithologists and Veterinary Residents , and others engaged in endeavors related to Veterinary Research and Veterinary Medicine.

About hosting organization

Conference Series is the world's leading specialist in organizing Academic, Scientific and Business conferences, meetings, symposiums and exhibitions in different verticals and horizontals like Medical, Pharma, Engineering, Science, Technology and Business to promote scientific research. Every year we host more than **3000+ global events** inclusive of **1000+ Conferences 1000+ Symposiums 1000+ Workshops** in **USA, Europe, Middle East and Asia** with the generous support and cooperation from our **30000+ Editorial Board Members, 1000+ Scientific Societies**. All the conference proceedings are published in the special issues of our **700+ Open Access International Journals** with the DOI provided by  Crossref

Major sessions

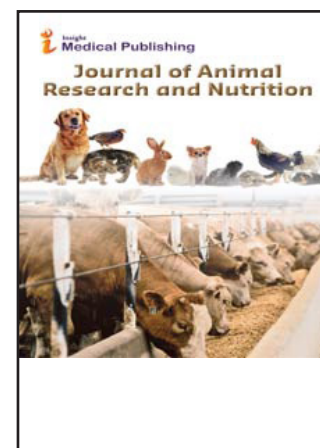

- Veterinary
- Veterinary Medicine
- Veterinary Epidemiology
- Veterinary Research
- Animal Nutrition
- Animal Reproduction
- Animal Biotechnology
- Livestock Production & Management
- Animal Welfare
- Poultry Production
- Dairy Technology
- Veterinary Care & Management

About Conference

Paris, France

Supporting Journals

- Journal of Veterinary Science & Technology
- Journal of Veterinary Science & Medical Diagnosis
- Research & Reviews: Journal of Veterinary Sciences
- Journal of Animal Nutrition

About Paris

Paris, France

Paris, the cosmopolitan capital of France, is one of the largest groups in Europe and the city is a symbol of French culture, with 2.2 million people living in the dense, central city and almost 12 million people living in the whole metropolitan area. Located in the north of France on the river Seine, Paris has the well-deserved status of being the most beautiful and romantic of all cities. It has an annual 30 million foreign visitors, and so is one of the most visited cities in the world. Paris has a typical Western European oceanic climate. The overall climate throughout the year is mild and moderately wet. Summer days are usually warm and pleasant with average temperatures hovering between 15 and 25°C (59 and 77°F) Paris needs no introduction. It's synonymous with food, culture, fashion, and architecture, rarely unsatisfactory to those who visit. Despite being the dream destination for millions of people each year, the French capital still has plenty hidden secrets to offer beyond the Eiffel Tower and its world-class museums. Paris is the home of imperative museums and cultural institutions and to truly understand Paris you have to immerse yourself in the city's artistic culture. Beyond the Louvre and the Musée d'Orsay, you can get your culture fix at the modernized Picasso Museum and the new Foundation Louis Vuitton, not to mention dozens of small museums and galleries. Paris has more than 421 municipal parks and gardens. The city is also a major rail, highway, and air-transport center, served by the two international airports Paris-Charles de Gaulle and Paris-Orly. Paris has many nicknames, but its most famous is "La Ville-Lumière" ("The City of Light"), a name it owes first to its fame as a centre of education and ideas during the Age of Enlightenment, and later to its early adoption of street lighting. Currency: The official currency of France is the Euro (€). Major credit cards are accepted in most hotels, shops and restaurants. Money can be changed at the main train stations, international airports, major banks, exchange bureaus, most large hotels and the post office. Time Zone: Paris is in the Central European Time Zone (CET). CET is 1 hour ahead of Greenwich Mean Time (GMT+1).
