WELCOME NOTES

On behalf of the organizing committee, it is a great pleasure to welcome you to the Malaysia-International ASAMI Conference 2021. This biannual event will be held from (24th -26th August 2021). In preparation for the event, the scientific committees have work hard to put together a very comprehensive program which covers diverse aspects of limb reconstruction using ilizarov and orthoplastic approach. Be prepared to be updated and educated by a well-constructed scientific program consist of lectures and hands on workshops which aims to deliver dynamic updates and knowledge by well-known expertise in their field.

We welcome researchers and surgeon to present in the oral and poster presentation where prizes will be given to the best three presenters. Delegates will also be offered demonstrations on new technologies and showcase of new products at an exhibition set which will be held throughout the event. It's with great honor that I cordially invite you to participate in the the Malaysia-International ASAMI Conference 2021.

I hope that you will find the meeting vastly informative and enjoyable. It will definitely be a great way for you to visit Malaysia and enjoy the delights of our country especially in Kuantan city, the gateway to the East CoastI am looking forward to seeing you and share our experience and build a lasting relationship together.

Thank you

ABOUT ASAMI CONFERENCE

ASAMI (Association for the study and application of the methods of ilizarov) was formed in 1982 to promote the ilizarov technique to the world. The first Malaysia ASAMI Conference was held in Hospital Klang chaired by Dato Dr Thirumal Manickam in 2013. It was well attended by almost 200 Orthopaedic surgeon interested in this area. The conference is aim to disseminate the technique and principle of Ilizarov in treating deformities, trauma and infection.

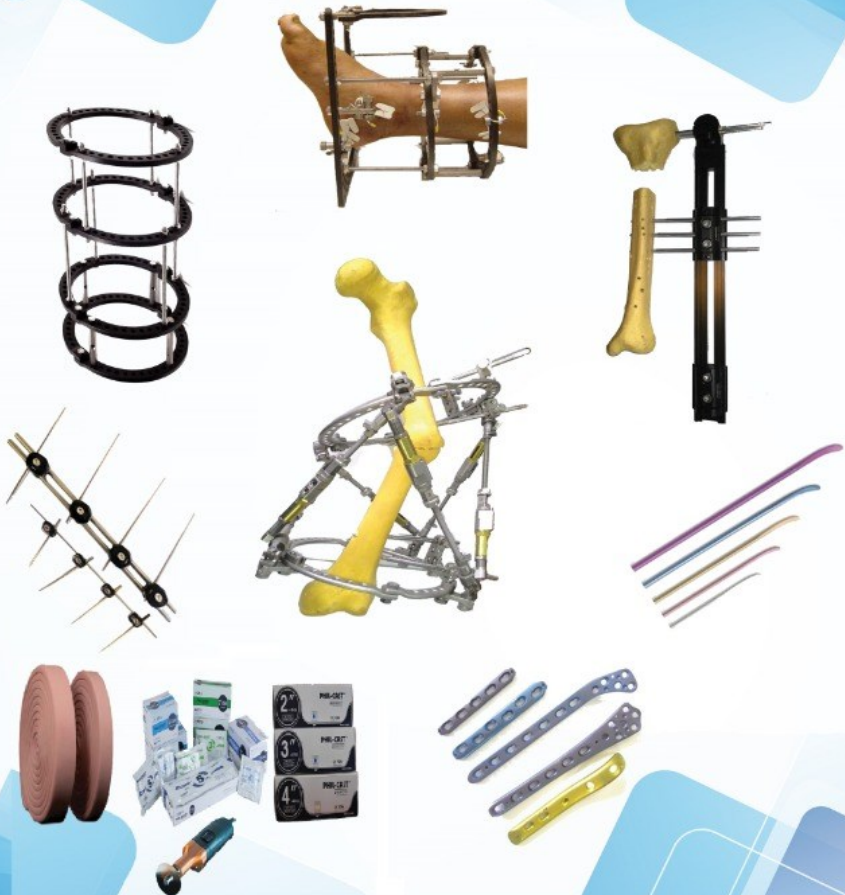

The Department of Orthopaedic, Traumatology and Rehabilitation (DOTR), IIUM has successfully run an Ilizarov workshop in 2017 in IIUM Medical Centre. Following the success, IIUM has been entrusted by the Limb Lengthening and Reconstruction Surgery (LLRS) interest group of Malaysian Orthopaedic Association (MOA) to organize the Malaysia-International ASAMI Conference 2021.

This conference is co-organised by Department of Orthopaedics, Traumatology and Rehabilitation, Kulliyyah of Medicine, IIUM and collaboration with Sultan Ahmad Shah Medical Centre (SASMEC@IIUM), ASAMI Malaysia, Malaysian Orthopaedics Association (MOA) and Atabara Orthopaedic Club.

FREE PAPER PRESENTATION

Abstract No	Topic	Title
1	Deformity	Managing severe kyphoscoliosis with halo-pelvic traction a case report
2		Tibialization of fibula, conquering tibia nonunion with large bony defect
3	Foot and Ankle	Prevalence and classification of accessory navicular bone a cohort, observational study in a University Hospital, Saudi Arabia
4	Infections	Management of Diabetic Foot Ulcer (DFU) using tibial transverse technique (TTT), bone lengthening; bangladesh experience
5		Management of pseudoarthrosis in children using Ilizarov external
6	Orthoplastics	A rare case of Superficial Leiomyosarcoma. Soft tissue reconstruction of lower limb following oncology excision.
7		Free functional latissimus dorsi muscle flap in the traumatic lower extremity a case report and literature review
8		Functional reconstruction of a combined tendocutaneous defect of the achilles using composite free anterolateral thigh fasciocutaneous flap with vascularized fascia lata
9		Predicting early mortality in patients with Metastatic Bone Disease (MBD) comparison of prognostic scores
10		Successful replantation of a traumatic bilateral lower limb amputation in Malaysia, a case report.
11		When Gustilo iii C and mess score 9 traumatic lower limb meets replantation a case report of lower limb replantation
12	Paediatrics	Birth-related distal humerus epiphyseal separation outcome following surgical management
13		Non-vascularized fibula graft in deformity correction of a young child
14	Rehabilitation	There is no leisure in treating orthogeriatric intertrochanteric fracture-stable fixation and early ambulation
15	Trauma	An irreducible variant of complex unstable intertrochanteric fracture-a technique for open reduction
16		Comminuted subtrochanteric femur fracture with intertrochanteric extension in above knee amputee
17		Femoral neck fractures the balancing act between fixing or replacing
18		Invaginated skin release of docking site under walant; obstacles during covid-19 pandemic
19		Mystery of isolated greater trochanter fractures is there more than meets the eye
20		Quality of life & functional outcome of open tibial fracture managed with Ilizarov external fixator as definitive management

PROSTEO^{MAX}TM

**Your Trusted Calcium Phosphate-
Based Bone Grafts**

- PROSTEO^{MAX}TM is a calcium phosphate-based bone cement that is used to treat bone loss and defects caused by trauma, non-union, and bone diseases.
- PROSTEO^{MAX}TM is made up of Tri-Calcium Phosphate and Tetra-Calcium Phosphate (>50%).
- PROSTEO^{MAX}TM offers osteoconductive and biodegradable properties.
- PROSTEO^{MAX}TM can be injectable into any bone cavity or be moulded into any shapes and sizes prior to surgeries. It can also be used to carry drugs – such as antibiotics – for drug delivery applications.
