Running title: Effectiveness of hearing conservation programme

-

**A review on the effectiveness of hearing conservation programme among noise-exposed employees**

Noraidah Ismail, PhD<sup>1</sup> and Mohd N Zakaria, PhD<sup>2</sup>

*<sup>1</sup>Department of Audiology and Speech-Language Pathology, Kulliyyah of Allied Health Sciences, International Islamic University Malaysia, Kuantan, Pahang, Malaysia and <sup>2</sup>Audiology Programme, School of Health Sciences, Universiti Sains Malaysia, Kelantan, Malaysia*

**Abstract:** Noise induced hearing loss (NIHL) has been regarded as a significant occupational health problem and it is increasing throughout the industrial world. To minimize the occurrence of NIHL among noise-exposed employees, hearing conservation programme (HCP) has been introduced. In this paper, the essential aspects of NIHL are reviewed as intended. Important considerations regarding the implementation of HCP including the barriers are highlighted accordingly. Based on the existing literature, more research efforts are required to support and promote the widespread implementation of HCP among industrial players. Furthermore, studying the effectiveness of dedicated training modules in HCP involving employees using various teaching methods can be the focus of future research.

**Keywords:** Noise, auditory system, hearing loss, hearing conservation programme, effectiveness

**Submitted:** August 02, 2021. **Revised:** August 10, 2021. **Accepted:** August 15, 2021.

has been accepted for publication after peer-review and revision. Thank you for your submission.

The attached version of your paper will be send later to our production editor at Nova Science in New York, who will set up the paper for proof, which you will receive in due course. When you receive the proofs please answer within 24-48 hours, because otherwise that will be the version published.

In an effort to more widely disseminate research beyond the limited printed journal, Nova is offering authors the option of including their works in our Open Access program. Once an article has been accepted for publication, the author has the option of participating in the Open Access program, which will make the full contents of his/her article available on our website as an immediate download with no cost to readers. You will receive an email from the publisher with the conditions involved for this option.

We would be happy if you would promote our journal to your librarian, your collaborators and colleagues.

You can yourself support the journal by ordering extra reprint copies of your paper, take out a personal subscription or use the open access option.

We look forward to receive further submissions from you or your collaborators.

**This special issue will also be published as a book, so note that you will get proofs and copyright forms several times from the publisher. Just proof read asap and sign the forms and send back to the publisher (even though the publisher already as the copyright, but they send out these standard and not individual forms).**

Warm regards

Joav Merrick
