Introduction

- Recognition of the importance of soft skills in the current healthcare setting has gained increasing momentum due to the high demand from society and employers.
- Many higher education institutions have a stronger emphasis on subject-specific knowledge, skill development, and performance which are commonly known as **hard skills** when compared to soft skills.
- Several factors have been shown to influence **the development of soft skills** including demographic makers, professional body/accreditation requirements and academics' expectations or views.

Background of the study

- The intangible nature of soft skills makes it difficult for nursing academics to evaluate nursing students' attainment of these skills.
- Nursing is a caring profession which has sympathy, empathy, compassion and helping others inherently which are known as soft skills and these skills should be tested in nursing students.

(Nurumal et al., 2019)

- A recent study found that there were nine soft skills elements: communication skills, social skills and responsibility, critical thinking skills, problem-solving skills, teamwork, leadership skills, professional and ethical decision-making skills, numeracy skills, and interpersonal skills can be tested in the structured nursing clinical skill assessment or commonly known as (OSCE).

(Jamaludin et al., 2022)

Problem Statement

- Most of the time, nursing academics give more focus to assessing nursing students' knowledge and dexterity performance in the clinical skill assessments and the **soft skills components are not given as an important matter.**
- In focusing primarily on assessing nursing students' hard skill competencies, **the nursing profession has given inadequate attention to developing their soft skill competencies.**

(Morrell, Eukel, & Santurri, 2020; Jamaludin et al., 2022; Williams-Buenzli, 2015)

Aim

To explore the nursing academic's view regarding soft skills elements in the currently structured clinical skill assessment for the undergraduate nursing program

Method

- **Method:** A qualitative study
- **Design:** A content analysis approach
- **Sampling:** A purposive sampling method
- **Sample size:** 10 out of 20 nursing academics
- **Study setting:** 7 higher learning institutions of Malaysia
- **Participants:** 2 (well-known nursing scholars) & the rest were experienced nursing academics in Malaysia
- **Data collection:** In-depth interviews using open-ended questions
- **Duration:** 45 to 95 minutes

Method

For ethical approval,

- It was obtained from the International Islamic University Malaysia's Research Ethics Committee and the ethics approval number IREC 2019-129.
- Voluntary participation, rights to withdraw and confidentiality of identity have been adhered to in this study.

Data Analysis Process

- The data were analysed manually through an **inductive content analysis approach**. (Erlingsson & Brysiewicz, 2017)
- **The unit of analysis** was recorded interviews
- Each recorded interview was transcribed, analysed and read several times to obtain a comprehensive view of the whole.
- The texts were divided into **condensed meaning units**.
- Each **condensed unit** was abstracted and labelled with a **code**.
- **Various codes** (the same meanings were grouped) formed **subcategories - create categories**
- Emerging **themes** based on the nursing academic' views and the qualitative content of their meaning.
- Finally, 4 themes with 15 categories were formed with the unanimous agreement of the researcher and the team.

Results

Characteristics	n (%)	Range
Age		37-63
Gender

Results

Theme 1: Awareness and involvement with 4 categories:

Theme 1: Awareness and involvement

" Softskill is very important because we are teaching our students to become very good nurses, and professional nurses so soft skill is one of the important components to be integrated into this profession. The elements of soft skills during those days are computer, communication, leadership and things management, entrepreneurship and all that. For the recent one, the current, new one from MQF, is even more detailed but can't remember"(P 3, P 4, P5, P 6)

"In the current OSCE, most of the students, I could say the majority of them cannot do documentation properly. Documentation is important in nursing." (P9 &P10)

"The student still passes the OSCE although they don't apply the steps such as "greetings to the client, "explaining the procedure" and "thanks to the client once completed". Because students are doing the procedures correctly. (P 6, P 9 & P 10)

Results

**Theme 2: Factors influencing on implementation of soft skills
in the structured clinical skills assessment with 4 categories:**

Theme 2: Factors influencing on implementation of soft skills in the structured clinical skills assessment

- *"Soft skill means Communication skills. Nursing profession deal with human being. We are not dealing with a machine, we are not dealing with having no life, definitely soft skill is very important because you know as a human being we have emotion, we have feelings, we have values and we have beliefs." (P 5&P 8)*
- *"How much we teach and show soft skills to students also, the student tendency to misinterpret that so much, you know... Nowadays, timetables are so packed and we also have no time, students also have no time for them to practice whatever we taught to them, especially for nursing procedures. (P7 & P10)*
- *"One of the important things is that there must also be a real model or a real human being in OSCE. The reason is that we use mannequins, If we use the real model, we have to pay." (P 7 & P 10)*

Results

Theme 3: Academic Responsibility with 4 categories:

Theme 3: Academic Responsibility

- *"The attitude of the teacher influence students. We have to show our soft skills to students. Students will learn from us. Another thing also we need to consider when taking students because some students are very weak in terms of their academic background and they are not qualified to be in nursing." (P 6, P 8 & P 10)*
- *"Students sometimes they see graduates nurses do a shortcut, they tend to follow. In terms of soft skills the clinical environment is also important, they need to see the right people, and the right role models for them to enhance. Clinical environment support is very important." (P 4 & P 5)*
- *"Another point is teachers must be available for students anytime they need them. This is how we can transfer soft skills to students" (P 7 & P 10)*

Results

Theme 4: Suggestions to overcome barriers with 3 categories:

Theme 4: Suggestions to overcome barriers

- *"In the future, we need to have a feedback system among academics as well as with students, after the OSCE. E.g "what do you think of that student?" "That one is very good, can she communicate well? For students, give them feedback on how they perform during OSCE". So that we can improve the soft skills part."* (P 2 & P 7)
- *"I think the best is the government should look into the salary of nurses. Most nurses are underpaid and the authorities should consider it. If not, no one wants to choose this profession in the future."* (P 6)
- *"Assessing soft skills during the OSCE time is quite difficult because we don't use the real human being. How you tackle human being is also important. There is a difference when we use the mannequin. So the best thing if we want to assess the soft skills it is better to use a real model. I mean in the future if we want to implement the soft skills it should be in a real-life situation."* (P 6)

Discussion

- Based on this studying findings, **assessment will direct student effort in developing soft skills.**
- Issues of **validity and reliability** must be addressed by those who are involved in assessment.
- The studied participants **supported the assessment of soft skills in formal and nonformal learning.**
- **Nursing academics perceptions are important elements when considering the delivery and assessment of soft skill development in nursing students.**
- **Perceptions of teaching and learning are influenced by academic level of awareness of options, involvement in activities, and beliefs about responsibility.**

Discussion

- All of the studied participants expressed their feeling to produce a competent nurse who equips with the soft skills and hard skills required to have a balanced curriculum, upgrade the nursing education, as well recognition of the nursing profession by the public.
- They explained their beliefs by emphasizing the transition of responsibility from the academics to the professional body as a moving direction for quality improvement of the nursing profession.

Conclusion

- Findings from this study provide new insights into nursing academic' perception of soft skills elements in structured clinical skill assessments of undergraduate nursing programme needs improvement and proper structure on how/what are the soft skills elements that want to measured for nursing students.
- These findings would assist in developing a more strategic framework for soft skills elements in structured clinical skill assessments in order to produce quality nursing graduates.

Competing Interests

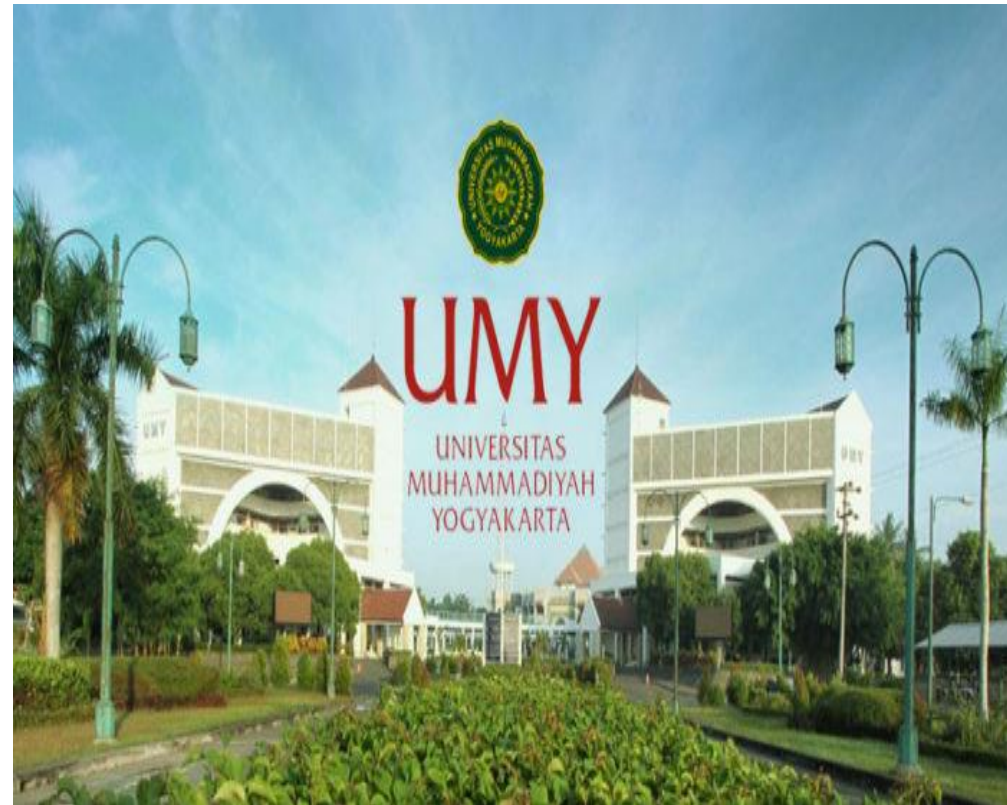

There is no conflict of interest.

Development of this manuscript is part of a PhD study.

The Speakers

ASSOCIATE PROF. DR.
CHONG MEI CHAN

University of Malaya,
Malaysia

CHONG MEI CHAN, PhD, is Associate Professor in Nursing at University of Malaya. She obtained her BNSc degree in Nursing from University of Malaya (1995) and the M.S. (community health) (2005) from University Putra Malaysia, and Ph.D. in Nursing from the Monash University Australia (2014). She has been active in the area of Gerontology Nursing, Maternal and child health, and E-learning for over 20 years and has been a frequent contributor to community on health promotion and social participation activities. Her international experience includes programs and collaboration with Australia, China, and Indonesia. Her current research understanding of food truck handler perception on food safety and nursing education during Corvid -19 Pandemic. She is active in nursing education and frequent speaker in nursing research workshop for Malaysia nursing Association. She is currently supervising 15 PhD candidates and 2 Master candidates by research. 12 PhD students completed, and two master students completed. She has been supervised more than 20 master students project paper. She has published more than 40 articles in peer review journal. More than 20 articles in Web of Sciences ISI listed journal and four Nursing books. She obtained RG Score of 24.04 and h-index in research gate is 12 with 460 citations. Google Scholar Citation 703, h-index 15

dr. H. Muhammad Budi
Hidayat, M.Kes

Kementerian Kesehatan RI

dr. H. Muhammad Budi Hidayat, M.Kes is a Council Secretary of health workers, Ministry of Health, Indonesia. He took his bachelor's degree in medical at Universitas Kristen Indonesia in 2003. Then finished his Master's at Sekolah Tinggi Ilmu Kesehatan Hang Tuah Pekanbaru in 2017. he was awarded the Satya Lancana Karya Satya 10 years from the president in 2017

Dr. Falasifah Ani Yuniarti, S.Kep., Ns., MAN is a lecturer in the Nursing Science Program of Universitas Muhammadiyah Yogyakarta. She took her bachelor's degree in nursing at Universitas Gadjah Mada in 2000. Then finished her Master's at Angeles University Foundation of the Philippines (2009) and Doctor's (2022) in Nursing at Universitas Gadjah Mada. She is expertise in Pedriatic Nursing. She also had several journal publications and her current research entitled "The Effect of Wet Cupping Therapy on Blood Pressure and Total Cholesterol on Healthy Young Male Adults" was published in 2021.

Program Schedule

The 4th International Conference on Nursing (ICONURS) 2022

Nursing Study Program, Master of Nursing Program

Universitas Muhammadiyah Yogyakarta (UMY)

Wednesday - Thursday, July 20th - 21th, 2022

Day 1

Wednesday, July 20, 2022

Time Western Indonesia Time/ WIB (GMT+7)	Agenda	Person in Charge	Room Link
08.00-09.00	Registration	Operator	https://s.id/Iconurs_day1
09.00-09.05	Opening	Avifah Noor Itsnaini, S.IP	
09.06-09.12	Quran Recitation	Afif dan Rausan	
09.13-09.17	National Anthem	Afif dan Rausan	
09.18-09.22	Mars Muhammadiyah	Afif dan Rausan	
09.23-09.29	Mars of Indonesian National Nurses Association	Afif dan Rausan	
09.30-09.33	Speech from the chairman of the committee	Dinasti Pudang Binoriang, Ns. M.Kep.,Sp.Kep.Ko m	
09.34-09.39	Speech from the Head of School of Nursing	Sutantri, PhD	
09.40-09.47	Speech from Chairman of the Indonesian National Nurses Association	Tri Prabowo, S.Kp., M.Sc	
09.48-09.50	Opening of Plenary Session	Avifah Noor Itsnaini	

Day 1**Wednesday, July 20, 2022**

09.51-09.54	Opening from Moderator	Wulan Noviani, Ph.D	
09.55-10.23	1st Speaker	dr. H. Muhammad Budi Hidayat, M.Kes	
10.24-10.25	Moderator	Wulan Noviani, Ph.D	
10.26-10.58	2nd speaker	Prof. Dr. Chong Mei Chan	
10.59-11.00	Moderator	Wulan Noviani, Ph.D	
11.01-11.31	3rd Speaker	Dr. Falasifah Ani Yuniarti, MAN	
11.32-11.54	Discussion	Wulan Noviani, PhD	
11.55-12.00	Closing Plenary Session	Avifah Noor Itsnaini, S.IP	
12.01-12.44	Break and Prayer		
12.45-14.45	Opening Ceremony of ICOSI	ICOSI operator	

Day 2**Thursday, July 21, 2022**

Time Western Indonesia Time/ WIB (GMT+7)	Agenda	Person in Charge	Room Link
07.30-08.00	Check-in Parallel Session A (Presenters, judges, moderators)	Operators	https://s.id/Iconurs_day2
08.00-10.00	Parallel session A	Operators and Moderators	
10.00-10.15	Break and Check-in Parallel Session B (Presenters, judges, moderators)		

Day 2**Thursday, July 21, 2022**

10.15-12.15	Parallel Session B	Operators and Moderators	
12.15-12.45	Break and Prayer		
12.45-13.00	Check-in Parallel Session C		
13.00-14.45	Parallel Session C		
15.00-16.00	Closing Ceremony of ICONURS	ICONURS operator	

Parallel Session
