Financial support

This book was made possible by the financial support of a grant SPP22-118-0118 and the patience of RMC.

This book is the product of 15 years of research from experts at the International Islamic University Malaysia. It shows how Muslim business leaders can transform ordinary organizations into organizations whose values reflect the Qur'an and the Sunnah.

It is based on the Prophetic Leadership Model – which has been tried and tested with thousands of participants – many of them working adults. It identifies adult learning is the key theory that underpins this transformation and coaching skills as the primary skill that every Muslim leader must possess.

In this book, the author does not preach. He simply shares his 15 years-long journey of self-discovery.

Dr. Rodrigue Fontaine is Assistant Professor in Management in Kulliyah of Economics and Management Science, International Islamic University of Malaysia (IIUM).
